

Here are some interesting figures from iThemba LABS South Africa from their ongoing neutron therapy programme. Tumour histologies treated during 2007 are as below:

<b>HISTOLOGY</b>	<b>Salivary gland</b>	<b>Breast</b>	<b>Antrum</b>	<b>Soft tissue sarcoma</b>	<b>Bone sarcoma</b>	<b>Neck nodes</b>
Adenocystic CA	5					
Adeno CA	4	2				
Carcinoma NOS		1				
Chondrosarcoma					1-Antrum	
Chordoma				1-Sacrum		
Ductal CA		42				
Nerve sheath tumour				1-ChestWall		
Mucoepidermoid CA	2					
Myoepithelial CA	1					
Pleomorphic CA	4					
Spindle cell tumour				1-pelvis		
Squamous CA	1	1	4			4

**TOTAL 75**

**See next page for 1988-2007 data**

Neutron therapy (Sept 1988 – 31 Dec 2007)

Total = 1519 patients

Salivary gland carcinoma	497
Breast carcinoma	263
Head & neck carcinoma	211
Soft tissue sarcoma	131
Bone sarcoma	110
Uterine sarcoma	93
Malignant Melanoma	64
Paranasal sinus carcinoma	63
Mesothelioma	21
Bronchus carcinoma	6
Cervical carcinoma	5
Other	42
